

REMARKS/ARGUMENT

Applicant encloses herewith the Third Declaration of Inventor William Stern Under 37 C.F.R. §1.132 (Stern-III). Stern-III is for the purpose of expanding upon information set forth in some of the exhibits to the previously-filed Second Declaration of William Stern Under 37 C.F.R. §1.132 executed September 7, 2007 (Stern-II). While compiling this additional information, typographical and computational errors were also noticed and are also corrected in the enclosed Stern-III declaration. The present Amendment to the specification reflects the corrections set forth in Stern-III, and corrects other informalities set forth in the SUMMARY section below.

Applicant's substantive response to the last Office Action on the merits was set forth in Applicant's response mailed to the Office on September 7, 2007, and is not repeated here. None of the corrections set forth herein, or in the enclosed Stern-III Declaration, are believed to alter the arguments, opinions or conclusions set forth in Applicant's September 7, 2007 submission.

Applicant also encloses another Information Disclosure Statement, and a Supplemental Declaration for Reissue Patent Application to Correct "Errors" Statement (37 C.F.R. 1.175).

SUMMARY OF THE PRESENT AMENDMENT

In accordance with Rule 173(g), all of the amendments herein are relative to the issued patent -- not relative to the text that existed prior to the present amendment. In the present amendment, the specification has been amended such that Tables 1 and 2 reflect the numerical values discussed in the enclosed Stern-III declaration. Typographical errors are also corrected,

including clarification of the position of Example 2 in the text. Brackets and underlines are added to reflect changes in Tables 1-3 relative to the original patent.

It is believed that the application is now in condition for allowance. Issuance of a notice of allowance is solicited.
